

# Labour Market Latest Trends 1st quarter 2007 data

Authors: Fabrice ROMANS, Omar S. HARDARSON

POPULATION AND SOCIAL CONDITIONS

16/2007

*Labour market*

This publication belongs to a quarterly series presenting the main results of the EU Labour Force Survey for the EU-27 and for all Member States.

**Chart 1: Employment rate<sup>1</sup> (15-64 years) for EU-27 from 2000Q1 to 2007Q1**

Source: Eurostat, EU-LFS

<sup>1</sup> Number of people in employment aged 15 to 64 years divided by the total resident population aged 15 to 64 years.

**Chart 2: Labour market indicators change for EU-27 from 2006Q1 to 2007Q1**

Source: Eurostat, EU-LFS

<sup>1</sup>Number of persons aged 15 years or more whose job started within the past three months

<sup>2</sup>French and German for 2006 and 2007 data are provisional (see methodological notes)

## METHODOLOGICAL NOTES

**Source:** the European Union Labour Force Survey (EU-LFS) is a quarterly, large sample survey providing results for the population in private households in the EU, EFTA, Acceding Countries and the Candidate Countries. Conscripts in military or community service are not included in the results. The sampling rates vary between 0.2% and 3.3%. The figures in this publication are not seasonally adjusted, due to the short times series available. The concepts and definitions used in the survey follow the guidelines of International Labour Organisation.

Definitions of indicators presented in this publication are in the Eurostat website:

[http://europa.eu.int/estatref/info/sdds/en/lfsi/lfs\\_series\\_sm.htm](http://europa.eu.int/estatref/info/sdds/en/lfsi/lfs_series_sm.htm)

**Provisional data:** French and German data for 2006 and 2007 are provisional. National statistics institutes are currently analysing several methodological issues. This may lead to revisions of the data later this year.

**Reference periods:** The data of Luxembourg cover the whole year 2006. The data for Croatia refer to the 2nd half-year 2006. The data for Switzerland refers to the 2nd quarter 2006. In Ireland, the data refer to seasonal quarter (December to February for Q1, September to November for Q4).

**Coverage:** The data for France cover the metropolitan territory (excluding overseas regions).

**Aggregates:** When data are unavailable for a country, the calculation of the corresponding aggregates takes into account the data for the same country one year before.

**Confidence limits:** All confidence limits are calculated at a level of confidence of 95%. The country limits are derived from coefficients of variation calculated by the National Statistic Institutes. When a coefficient is not available, the coefficient for the last quarter available is taken. For the calculation of limits of aggregates, we assume that the EU-LFS is a stratified sample with the country as the first stratum.

**Symbols:** figures flagged with "u" lack reliability due to small sample size or the non-response for the underlying variable is more than 10%; ":" colons are used for unavailable or extremely unreliable data. "|" vertical lines are used to indicate breaks in time-series. Quarter 1 of the year 2007 is written as 2007Q1.

**Economic activity:** In tables 5, 7, 9, 11 breakdowns are based on the industry of the main job. The classification used is the NACE, revision 1.1.
