

Flash estimate - March 2010

Euro area inflation estimated at 1.5%

Euro area¹ annual inflation² is expected to be 1.5% in March 2010 according to a flash estimate issued by Eurostat, the statistical office of the European Union. It was 0.9% in February³.

Computation of flash estimates

Euro area inflation is measured by the Monetary Union Index of Consumer Prices (MUICP). To compute the MUICP flash estimates, Eurostat uses early price information relating to the reference month from Member States for which data are available⁴ as well as early information about energy prices.

The flash estimation procedure for the MUICP combines historical information with partial information on price developments in the most recent months to give a total index for the euro area. No detailed breakdown is available. Experience has shown the procedure to be reliable (19 times exactly anticipating the inflation rate and 5 times differing by 0.1 over the last two years). Further information can be found in [Eurostat News Release 113/2001](#) of 5 November 2001.

Scheduled publication dates

Index for	MUICP flash estimates	News release on euro area, EU and Member States
March 2010	-	16 April 2010
April 2010	30 April 2010	18 May 2010
May 2010	31 May 2010	16 June 2010

1. The Member States of the euro area are Belgium, Germany, Ireland, Greece, Spain, France, Italy, Cyprus, Luxembourg, Malta, the Netherlands, Austria, Portugal, Slovenia, Slovakia and Finland.
2. Annual inflation is the price change between the current month and the same month of the previous year.
3. See News Release 39/2010 of 16 March 2010.
4. The MUICP flash estimate usually includes early price information representing approximately 95% of the euro area total consumption expenditure weight (see News Release 53/2006 of 28 April 2006).
