

REVISED VERSION

Eurostat has received, after the publication of its News Release of Friday 22 January, corrected German data on New Orders. These new figures were revised significantly upwards, and had an impact on the European aggregates. As a result, Eurostat publishes today a revised News Release, which takes into account the new data from Germany.

We apologize for any inconvenience that this revision may cause.

November 2009 compared with October 2009

Industrial new orders up by 2.7% in euro area

Up by 2.6% in EU27

In November 2009 compared with October 2009, the **euro area**¹ (EA16) industrial new orders index² rose by 2.7%. In October³ the index fell by 2.1%. In the **EU27**¹ new orders increased by 2.6% in November 2009, after a decrease of 1.5% in October³. Excluding ships, railway & aerospace equipment⁴, for which changes tend to be more volatile, industrial new orders rose by 2.7% in the **euro area** and by 2.9% in the **EU27**.

In November 2009 compared with November 2008, industrial new orders decreased by 0.5% in the **euro area** and by 1.2% in the **EU27**. Total industry excluding ships, railway & aerospace equipment⁴ dropped by 0.8% in both zones.

These estimates are released by **Eurostat, the statistical office of the European Union**.

Monthly changes

In November 2009 compared with October 2009, new orders for intermediate goods increased by 2.3% in the **euro area** and by 2.1% in the **EU27**. Capital goods rose by 1.1% and 2.8% respectively. Durable consumer goods gained 0.6% in the **euro area** and 0.3% in the **EU27**. Non-durable consumer goods grew by 0.8% and 1.6% respectively.

Among the Member States for which data are available, total manufacturing working on orders rose in fifteen and fell in eight. The highest increases were registered in **Austria** (+10.3%), **Estonia** (+7.4%) and **Greece** (+7.3%), and the largest decreases in **Hungary** (-9.6%), **Ireland** (-4.4%) and **Bulgaria** (-4.1%).

Annual changes

In November 2009 compared with November 2008, new orders for non-durable consumer goods rose by 1.6% in the **euro area** and by 4.3% in the **EU27**. Capital goods increased by 0.8% in the **euro area**, but fell by 1.9% in the **EU27**. Intermediate goods decreased by 2.1% and 1.8% respectively. Durable consumer goods declined by 5.3% in the **euro area**, but grew by 0.1% in the **EU27**.

Among the Member States for which data are available, total manufacturing working on orders rose in nine, fell in fourteen and remained stable in **Italy**. The highest rises were registered in **Slovenia** (+10.6%), the **Czech Republic** (+7.9%) and **Finland** (+6.9%), and the largest falls in **Ireland** (-26.5%), **Lithuania** (-24.8%) and **Estonia** (-16.3%).

1. The euro area (EA16) includes Belgium, Germany, Ireland, Greece, Spain, France, Italy, Cyprus, Luxembourg, Malta, the Netherlands, Austria, Portugal, Slovenia, Slovakia and Finland.
The EU27 includes Belgium (BE), Bulgaria (BG), the Czech Republic (CZ), Denmark (DK), Germany (DE), Estonia (EE), Ireland (IE), Greece (EL), Spain (ES), France (FR), Italy (IT), Cyprus (CY), Latvia (LV), Lithuania (LT), Luxembourg (LU), Hungary (HU), Malta (MT), the Netherlands (NL), Austria (AT), Poland (PL), Portugal (PT), Romania (RO), Slovenia (SI), Slovakia (SK), Finland (FI), Sweden (SE) and the United Kingdom (UK).
2. The new orders index measures the value of future deliveries of products and services (which are directly linked to these products) to be provided by a producer to a third party on the domestic and non-domestic market. The total manufacturing aggregate includes only those NACE levels required by the STS Regulation to be supplied by the Member States (NACE 13, 14, 17, 20, 21, 24 to 30) and is referred to as "total manufacturing working on orders". The euro area and EU aggregates normally do not include Member States for which no data is available.
The seasonally adjusted euro area and EU series are calculated by aggregating the unadjusted series from individual Member States and performing an adjustment for seasonal effects on these series. Therefore the seasonally adjusted figures for the European aggregates are based directly on the unadjusted series coming from the Member States and **not on an aggregation of the seasonally adjusted indices from the Member States**. The euro area and EU seasonally adjusted growth rates might differ from the weighted growth rates of the individual Member States. This procedure also implies that the aggregation of the overall figures is not based on the published details.
3. Data of previous months have been revised compared to those issued in News Release 2/2010 of 6 January 2010. The figures for October 2009 were -2.2% in the euro area and -1.6% in the EU27 for the monthly changes, and -14.5% in the euro area and -14.1% in the EU27 for the annual changes.
4. New orders for heavy transport equipment (NACE 30, which includes ships, railway and aerospace equipment) tend to be very volatile with a limited immediate impact on production. The aggregate "Manufacturing working on orders excluding heavy transport equipment" is less erratic. The share of heavy transport equipment in total manufacturing working on orders is 2.9% for the euro area and 3.0% for the EU.
5. Data for Ireland is working day adjusted.

Issued by: **Eurostat Press Office**
