Confidentiality and privacy aspects of data integration – principles and guidelines

UNECE Statistical Division
Tiina Luige

Background

- ❖ Request from CES in June 2006
- ❖ CES Task Force set up in February 2007
- ❖ To develop a set of principles and practices which aim to establish a common framework for assessing and mitigating legislative and other confidentiality and privacy aspects of the creation and use of integrated datasets for statistical and associated research purposes

Draft principles and guidelines

- ❖ For whom? – More useful for countries outside EU and countries who only recently have started to deal with data integration issues
- ❖ CES Bureau discussed in October 2008
- ❖ Many comments and proposals for changes

17 February 2009
